

Don't Let Your Beloved Cat Jeopardize Your Real Estate Investment

Introducing SUNSTAR's QAIS-air-04 — An Innovative Filterless Air Purifier and Deodorizer Designed for Pet Odor Control

You know that smell. It hits you right in your face when you open the door. It tells you the owner of this house is also a pawrent of cats.

Yes, you guessed it right — the cat litter box smell.

The infamous smell makes your place uninviting AND may even be jeopardizing your house's value.

Stop Ammonia From Invading Your Home

Ammonia is the number one source of pet odors. When your furry friends use the litter box, the ammonia from their urine immediately starts to diffuse into the air. Ammonia is lighter than air so it moves upward and spreads — *seeping into your beautiful home*. And, did you know? Ammonia is not easy to remove once in the fabrics such as carpet — criteria to decrease the value of your property.

That's why we designed QAIS-air-04 to be wall-mounted *right above the litter box*. QAIS-air-04 catches pet odors *at the source* from above before they rise and spread throughout your home.

* Product is not effective against all odors, bacteria, and viruses. Effectiveness may vary depending on the type of odor, bacteria, or virus, and the environment in which the product is used.

Protect Your Family's Health and Your Investment with PCO Technology

When removing odors, using ozone is known to be one of the most effective methods. But ozone can be harmful to your family's health.

Don't worry — QAIS-air-04 does not use ozone, **making it a safe option for your feline and human family**. We've developed advanced PCO Technology, PiCTECH with everyone's health in mind.

PCO technology is a new cutting-edge method for air purifiers— short for photocatalytic oxidation. Unlike traditional deodorizers that simply mask unpleasant smells after they spread or use harmful chemicals to remove the odors, PiCTECH **safely eliminates odors right at their source**. The combination of UV light and PiCTECH inside of QAIS-air-04 breaks down bacteria and pollutants in the air, effectively getting rid of the unwanted smell.

By using QAIS-air-04, you can protect your home's value while protecting your family's health!

Provide a Safe Space with Our Pet-Friendly Air Purifier

QAIS-air-04 has many safety features for your beloved cats. It comes with cord covers and uses low voltage to avoid chewing accidents. Its wall-mount design prevents your furry friend's hair from accidentally getting caught in the air inlet.

The running sound is unbelievably quiet at only 21~26dB, which is comparable to the sounds of leaves rustling and whispering. It's even quieter below the unit than above the unit. Why? Because your furry friend spends their time below the unit — *ensuring an undisturbing environment for your beloved cats*.

So QAIS-air-04 has great features for your beloved cats. How about for the human users?

Eco-Friendly While Being Lazy with Our Easy Maintenance

We understand that pet owners have enough on their plates. That's why QAIS-air-04 features hassle-free maintenance. You only need to vacuum the air inlet once in a while when dust collects. That's it! Unlike other air purifiers that require filter replacements, QAIS-air-04 eliminates the need for filter changes. **It doesn't only save you time and money, it's also eco-friendly**. Simply install QAIS-air-04 and enjoy fresh, odor-free air knowing you are doing good for the environment too.

Don't risk losing value on your property. You worked hard to invest in your home, let's properly protect it with QAIS-air-04.

We collaborated with CATSTER to give you a \$50 discount with the coupon code "CATSTER50". So go take advantage of this discount right now. You don't want to look back years from now and wish you had done something earlier.

Multiple cats and finally NO odor

I have always had a cat for more than half of my life and most of those years at least two cats. I am well aware of the odors that come along with these adorable feline kiddos.

I was honestly very surprised by this product! It does exactly what it claims. I've smelled nothing whatsoever coming out of the litter box plus it was easy to set up.

The instructions are super easy for anyone! The motor is so quiet I can barley hear it even on Max mode. I have kept it on the low setting, and it works perfectly with two cats using the same box. The design is sleek and is not obtrusive in any way on my wall.

Highly recommend!! *****

Two Golden Cats **Verified**

The odors have vanished!

We are so impressed with our QAIS-air- 04 purifier! It is a genius design - simple, stylish, light, yet it gets rid of the odors from our kittens' litter box (and they go to the bathroom a lot!). The bonus for us is aside from eliminating odors, it's quiet (unless you run the MAX mode), and there are no filters to clean! Can't recommend this enough to pet owners!

It really works!! And great for owning 2 cats.

My cat produces some smelly stuff. If you know what I mean! And this product is the first air filter/deodorizer that I've ever had work this well. I've been super impressed!

QAIS-air-4 is an incredible purifier review from a multi cat household!!!

We give this a 10/10 rating from an indoor multi cat family. Not only is this purifier sleek and modern looking, it is so easy to install! It's whisper quieter and does an incredible job eliminating odors before they spread. We have used the booster mode for extra freshness when we were expecting guests. We cannot recommend the QAID-air-4 highly enough to keep your home fresh and clean. Sunstar pays attention to details from design to instructions, to supplying everything you need for a smooth installation. It shows how much they care about families and their pets 😊
